

SUBJECT INDEX

316L SS	13	copper.....	385
3D modeling	166	copper ions	5
activating agent.....	97	corrosion.....	27, 390
activation energy.....	234, 256	Cu/Zn	385
activation parameters	430	current collector	48
activator halogenide.....	446	Cyanex 272.....	75
ADME	308	cytotoxicity.....	196
adsorption	188	D2EHPA	407
aerobic photosynthesis.....	53	delamination.....	349
Al ion	97	dental polymers	321, 328
aluminium.....	390	desalination	250
Alzheimer	289	DFT	196, 227, 299, 313
ammonium removal.....	53	dip coating.....	13
amorphous carbon.....	97	DNA interaction	196
analytical solution.....	349	docking.....	40, 308
anticancer.....	227	Donepezil hydrochloride	289
antidepressant	299	drug delivery	289
antioxidant activity	424	DSC.....	418
anti-plane wave.....	367	economic efficiency	108
aqueous medium	227	effective moisture diffusivity	234, 256
Ba and Co co-doped TiO ₂	85	electrical properties	335
bacteria	40	electrochemical impedance spectroscopy (EIS).....	133
ball milling.....	183	electrochemical performance	13
benzanthrone derivatives	273	enthalpy.....	103
BIEM	367	entropy	103
bimetallic catalyst	61	environment.....	434
bioelectrochemical systems	53	environmental impact.....	117
biomass combustion.....	141	environmental protection.....	108, 441
biomethanation	53	EPD.....	13
biosorption	5	EPDM rubber	214
blueberries	256	ethanol stillage	53
boiler plant.....	153	europium	75
borehole heat exchangers.....	149	extraction mechanism.....	407
brown crab	234	fat replacer.....	418
Bupropion	299	fermented beverages.....	424
burner.....	153	flexible polymer electrolytes.....	133
calcium oxalate	278	flow aerodynamics	166
capacitance retention	97	Flower stalks	97
carbon-based electrodes.....	61	FMOs	308
carbon-based epoxy nanocomposites.....	335	food antioxidant	424
catalysis	32	frequency factor	103
Ce (IV).....	407	FTIR.....	5
ceria/phosphate conversion coatings.....	390	fuel cell.....	434
chemical reaction engineering	32	gas cleaning.....	441
chemometrics.....	21	gas diffusion electrode	61
chitosan.....	13	Gaussian 09.....	242, 299, 313
chlorine compound	308	geranial.....	40
cisplatin derivatives	227	Gibbs' free energy.....	103
CO ₂ reduction	283	GM surface elasticity	367
co-activation	446	graded PEM half-plane.....	367
color change.....	234	graphene nanoplates	344
combustion chambers	166	graphene oxide nano colloid	344
combustion process.....	153	ground thermal properties	149
complexes	196	hard coatings	160
composite ceramic materials.....	344	herbal drug	40
composites	133	hydrogen.....	434
controlled drug delivery system.....	295	hydrogen economy	434
Coomassive brilliant blue dye.....	85	hydrogen storage	183

Impregnation.....	188	polysaccharide.....	289
incineration.....	441	porous ceramics.....	344
Inhibitors.....	278	pregabalin.....	295
interim dental materials.....	321, 328	preliminary dental prosthetics.....	321
iodide.....	188	preliminary non-removable prosthetics.....	321, 328
IoT.....	117	principal component analysis.....	328
Joule-heating.....	335	propanal.....	430
kinetics.....	103	PVD.....	160
lemon balm.....	5	quantum mechanical methods.....	242
lemon grass oil.....	40	reactivity indices.....	227
liquid crystals.....	133	response surface methodology.....	75
liquid-liquid extraction.....	407	risk analysis.....	117
livestock farms.....	108	risk management.....	108
livestock management.....	117	rod lenses.....	414
luminescent dyes.....	273	<i>Saccharomyces cerevisiae</i> yeast.....	273
meat sausages.....	418	scale formation.....	278
mechanical characteristics.....	32, 328	scattering.....	414
membrane.....	250	scavenging activity.....	424
mesoporous SBA-15.....	188	Schiff base.....	196, 308
metal hydrides.....	434	SEM.....	5
Metal-organic framework (MOF).....	283	separation.....	75
Mg ₂ NiH ₄ hydride.....	183	serum antioxidant activity.....	385
microalgae.....	53	silver.....	188
microbial sulfate reduction.....	53	simulation.....	32
mitigation strategies.....	117	SNCR.....	141
mobile analyses.....	414	sodium dodecyl sulfate (SDS).....	430
modeling.....	349	solid fuel.....	166
mold making.....	160	solid waste treatment.....	441
molecular docking.....	196	stability and activity.....	295
molecular modeling.....	32	strain.....	349
multiphysics simulations.....	335	stress.....	349
multi-walled carbon nanotubes.....	214	stress concentration.....	367
Na ⁺ -ion conducting polymer electrolytes.....	133	sulfide removal.....	53
nanocomposites.....	349	supercapacitor.....	97
nano-cracks.....	367	supported liquid membrane.....	75
nanoparticles.....	85	surface modification.....	188
natural rubber.....	214	surfactants.....	126, 267
Ni/Zn batteries.....	126	synthesis.....	196
NiMH battery.....	183	texture.....	418
non-co-precipitative.....	446	thermal response test.....	149
NOx.....	141, 153, 166	thermal transport properties.....	335
Nyquist plot.....	97	thermodynamic functions.....	407
order.....	103	thermodynamics.....	430
osteoporosis.....	385	titanium oxide (TiO ₂).....	85
oven drying.....	256	toxic elements.....	21
packed bed columns.....	441	toxicity.....	273
Paint binder.....	267	turbulence model.....	166
peach juice.....	414	ultrasonic pretreatment.....	256
permeability.....	75	uptake from agro products.....	21
pervaporation.....	250	UV light.....	85
pesticides.....	242, 313	vacuum oven drying.....	256
phenolic compound.....	424	vegetable oil emulsions.....	418
phosphomolybdic acid.....	250	viability.....	273
phosphors.....	446	volatile substances.....	153
photocatalyst.....	283	water.....	250
photocatalytic activity.....	283	water-based styrene/acrylic copolymer.....	267
pinoxaden.....	313	wear resistance.....	160
PLF.....	117	wetting agents.....	126
poly(ethylene-alt-maleic-anhydride).....	295	XPS.....	5
polyacrylic acid sodium salt.....	278	YSZ.....	13

zero-waste production.....	108	ZnO additives	48
zinc	27, 385	Zn-Pb factory	21
Zn electrode - reversible	48	ZnS	446
Zn/ZnO paste - optimized	48	ZrO ₂ sol-gel film	27
Zn-based alloys	27
